UEF Snippets

A set of User Experience Framework (UEF) Snippets for Visual Studio Code. UEF is the official web application design system of the Social Security Administration.

Create a new HTML document and type `uef` to see all available snippets. Note: For these snippets to accurately render page content you need to have the appropriate UEF libraries loaded in HEAD. See the `!!uef3` or `!!uef21` snippets to see how this is done--or just start with a blank HTML page and use one of those snippets.

UEF (Web Component Edition) Snippets
